Penetrating Lubricants

Penetrating lubricants are excellent for penetrating rust, corrosion and moisture in order to remove parts, fasteners and corroded connections. They are extremely versatile and can even be used as cleaning agents to remove grease, adhesives, tar, decals, glue and rust. This is because the fluid can be used as a solvent cleaner or degreaser for dissolving contaminants. Once the fluid has mobilized the residue, it can be easily wiped away using a cloth or light abrasive.

ULTRA PEN is a powerful, multiple action penetrant and protective shield that prevents further corrosion. ULTRA PEN's four way action lubricates, penetrates, displaces moisture and prevents rust from forming. Even penetrates through standing water, allowing for use in both wet and dry environments. Non-flammable.

CHILL OUT shrinks metal to create small openings that allow the lubricant to penetrate and release the toughest bonds. Has no chlorinated solvents and is a low VOC product. Fortified with Teflon it provides long-lasting residual lubrication. The 360° spray anyway valve allows for use in any position and for access to hard-to-reach areas while the large pad actuator prevents freezing of fingertips.

ULTRA PEN CHERRY - Pleasant cherry scent makes it perfect for interior uses, compliant in all 50 states

ULTRA PEN original - Non-conductive to 30,000 volts, Not available in CA

CHILL OUT - Non-conductive to 30,000 volts, Low VOC

Great For Use On:

- ⇒ Door hinges
- ⇒ Locks
- ⇒ Nuts and bolts
- ⇒ Rusted parts
- ⇒ Machine parts
- ⇒ Industrial door rollers
- ⇒ Gears
- ⇒ Frozen hinge pins
- ⇒ Air tools
- ⇒ Bushings
- ⇒ and more...
