Black Sil

Black RTV

BLACK SIL RTV silicone for oxygen sensors. This RTV silicone is great to use to create gaskets in place, is also an excellent adhesive, sealant and caulk. Ideally suited wherever a strong, permanently flexible weatherproof caulk, adhesive or sealant is needed. Excellent as an adhesive for bonding plastic and metal. Works well in high humidity, is mildew resistant, and won't fade or discolor with aging. When fully cured forms an extremely tough, rubbery solid like material. Also available in Red, Clear and White.

Areas of Use:

- Oil Pans
- Weather-stripping
- Push Rod Covers
- Oil Pumps
- Timing Gear Covers
- Transmission Pans
- Water Pumps
- Cam Shaft Rear Covers
- Differential Seals
- Valve Covers
- Electrical Control Boxes
- Compressors
- Axle Covers
- Thermostat Housing
- Threaded Assemblies

Effective Against:

- Oils
- Transmission Fluids
- Coolants
- Greases
- Water

Directions for Use:

Surface must be clean, dry and free of oil, tar, dirt and dust for best adhesion. Hold can at 45° angle and apply a continuous bead of 1/16" to 1/8" to the mating surface, encircling all bolt holes. For adhesion to both parts, assemble immediately. For one part adhesion, allow 10 to 15 minutes for bead to skin. Assemble parts, but do not squeeze gasket out by over tightening bolts.

Product #ABK308

NEGEN
BRAND

Specifications:

Classification	RTV silicone
Color	Black
Odor	Acetic acid like
Solubility in water	Not available
Flammability	Not available

Certified 100% Women-Owned Small Business
