Nexzymes Block (5 & 10)

Product #BGP9342
#BNZ9342

The NEXZYMES BLOCK is a solid, bacterial laden brick for use in degrading organic waste grease traps. The NEXZYMES BLOCK contains safe, naturally occurring bacteria, which are present in high numbers to handle difficult organic problems. The unique NEXZYMES BLOCK will gradually dissolve over a 35 to 120 day period, depending on flow rates, which allows for continuous treatment and degradation of grease. The naturally occurring bacteria contained in the NEXZYMES BLOCK reduce odors, sludge, fats, oils and grease build up. The NEXZYMES BLOCK eliminates the need for manually dosing of liquid or powder bacteria, and also eliminates the need for costly metering pumps. The NEXZYMES BLOCK automatically generates and maintains the proper daily doses of bacteria.

Areas of Use:

- cities
- counties
- municipal
- commercial

Effective Against:

- grease
- sludge
- fats
- oils
- odors
- other organic matter

Advantages:

1. Provides 24/7 treatment of waste, not just periodic doses of liquids or powders.
2. Reduces mal odors, hydrogen sulfide and sludge buildup.
3. Extremely high concentrations of bacteria make for a very cost effective treatment program, while reducing the need for pump-outs.
4. Automates septic and grease trap maintenance programs.
5. Breaks down fat and grease buildup.
6. Eliminates the need for metering pumps, and the breakdowns associated with equipment. Won't stop treating because a feed pump fails.

Specifications:

Classification	Solid bacterial brick
Color	Red
Odor	Mild earthy
VOC	Negligible
