Vanilla-Killa

Insecticide

Product #AVK407

Without a doubt, VANILLA-KILLA is the first insecticide you'll be happy to use. VANILLA-KILLA, as the name suggests, is a vanilla scented insecticide that leaves a pleasant vanilla aroma with no lingering harsh chemical odors. Don't let this pleasant scent fool you, as VANILLA-KILLA has a powerful effect on crawling insects. Formulated with Tetramethrin, VANILLA-KILLA drops bugs in their tracks. It also contains Permethrin which establishes an invisible barrier that keeps bugs from coming back. This potent combination enables VANILLA-KILLA to create an insect defense system that lasts up to 3 months after only one application.
